NOTICE OF INTENTION TO COMMENCE SMALL MINING OPERATIONS

The informational requirements of this form are based on provisions of the Mined Land Reclamation Act. Title 40-8, Utah Code Annotated 1987, and the General Rules as promulgated under the Utah Minerals Regulatory Program.

"Small Mining Operations" means mining operations which disturb five or less surface acres at any given time.

GEN	ERAL INFORMATION (Rule R647-3-104)
1.	Name of Mine: Honey Onyx
2.	Name of Operator Applicant: Feller Holding Corporation Company () Corporation (*) Partnership () Individual () Operator Feller Stone Inc. Permanent Address: 120.3 (1)

IV. OPERATION AND RECLAMATION PRACTICES (Rule R647-3-107, 108 & 109)

The reclamation and operation obligation is to keep the area clean and safe, minimize hazards to public safety, return the land to a useful condition, and reestablish at least 70 percent of the premining vegetative ground cover. To accomplish this, the operator will need to perform reclamation concurrently, or at the completion (within one (1) year) of mining:

- 1. Keep the mining operation in a safe, clean, and environmentally stable condition.
- 2. Permanently seal all shafts and tunnels to prevent unauthorized or accidental entry.
- 3. Plug drill holes with a five foot cement surface plug. Holes that encounter fluids are to be plugged in the subsurface to prevent aquifer contamination.
- 4. Construct berms, fences, or barriers, when needed, above highwalls and excavations.
- 5. Remove, isolate, or neutralize all toxic materials in a manner compatible with federal and state regulations.
- Remove all waste or debris from stream channels.
- Dispose of any trash, scrap metal, wood, machinery, and buildings.
- 8. Conduct mining activities so as to minimize erosion and control sediment.

tile topsoil and suitable overburden prior to mining. Ze highwalts by backfilling or rounding to 45 degrees or less, where feasible, reshape the near its original contour, and redistribute the topsoil and suitable overburden.
ze highwalls by backfilling or rounding to 45 degrees or less, where feasible; reshape the near its original contour, and redistribute the topsoil and suitable overburden.
ly prepare seedbed to a depth of six inches by ripping, discing, or harrowing.
disturbed areas with adaptable species. (The Division recommends seeding 20 lbs./acre ve and introduced species of grass, forb, and browse seed, and will provide a specific list if requested.)
ne seed with a rangeland or farm drill, or if broadcast seeded, harrow or rake the seed inch into the soil - fall is the preferred time to seed.
NCE REQUEST (Rule R647-3-110)
